

PIVOT DOORS

available at Bartels Doors

INTERIOR DESIGN SINCE 1919

COMTÜR
EXCLUSIVE DOORS

A PIVOT DOOR IS A UNIQUE DESIGN STATEMENT

Pivot doors provide an almost unlimited range of design possibilities indoors and outdoors. Thanks to the innovative Pivot hinges, they function in very large dimensions and a wide range of surfaces are available, including glass, original old wood, stone or steel. Of course, there are also beautiful veneers, a special RAL painted finish or a design of the ComTür product lines: Modern interior doors, traditional doors, front doors and functional doors are possible.

On request, the pivot door can be installed flush with the wall and the surface can be generously continued on the wall or facade. ComTür distinguishes the models CIRCUM (pivot front doors) and SVING (pivot interior doors).

GLASS & WOOD

ComTür reinvents the Loft door and combines the Pivot door system with glass and effect lacquered wooden frame. This creates transparent eye-catchers with a warm character. The arrangement and division of the glazing beads and the surface of the wooden frame offer you customization options, whether in black steel look, with effect varnish or as a natural wood surface to match the floor.

2-leaf room-high pivot glass door

Pivot glass door with central pivot

SVING

PIVOT INTERIOR DOORS FOR A NEW KIND OF ROOM DESIGN

DESIGN & AESTHETICS

Today, doors are no longer exclusively functional. They are also increasingly used as an exclusive design element for interiors. Pivot doors represent design and aesthetics, they are invisible when closed, but offer a spatial effect when opened.

The position of the pivot point can be varied as well as the possibility to fix the door at 90°. This technique allows independent and adjustable gentle closing. Various systems with and without frame and seal are available for wall connection.

You can design a door (or have it designed) whose functionality and effect is adapted to your desired spatial expression.

Here too, all options are open to you in terms of door dimensions, whether as a room-high door or an oversized door, our flexible production fulfils every customer requirement and manufactures your doors to measure.

DOORS AS A DESIGN ELEMENT OF THE FAÇADE

FREEDOM OF DESIGN

ComTür also guarantees flexibility in design for Pivot entrance doors. You can create your door in the style of the house from outside and adapt it to the interior style in color, wood type and design.

The Pivot hinges allow the production of entrance doors in large dimensions and with high weight for an individual entrance door, matching the façade. The top surfaces of the door can thus be continued flush with the side panel and the façade.

Pivot front door with ceramic deck

Pivot front door with PVD deck (division according to customer requirements)

CIRCUM

INDIVIDUAL ENTRANCE DOORS WITH DESIGN AND SECURITY

Pivot front door with barrier-free threshold

The integration of a door closer or an electric door drive to assist opening for barrier-free access is easily possible.

ON THE SAFE SIDE

The Pivot entrance door CIRCUM is based on the patented double-shell Duotherm technology of the ComTür entrance door line, for security, thermal insulation and design variety.

The basic equipment of the door includes the 5-fold safety locking [with 5 locking points] on the lock side. In case of increased security requirements, this can be supplemented by an electromotive safety interlock on the hinge side and additionally on the lock side. Furthermore, control systems and alarm system components can be integrated.

The Pivot Hinge Systems allow fixing at 0° and 90°, as well as self-closing at +125° and adjustable closing damping (Soft Close) and opening damping.

PRODUCT OVERVIEW

DESIGN FREEDOM

INTERIOR DESIGN SINCE 1919

For us, doors are wall-shaping elements – whether in traditional period styles, as puristic designer doors, made-to-measure special designs to match other interior decor and furnishings or as front doors that are integrated in the facade.

ComTür offers an extensive range of door concepts for you to exploit your design freedom.

CONTEMPORARY & TIMELESS

Sophisticated designs, reduced to the essentials

TRADITIONAL & CLASSIC

Our classic designs – stylish doors with innovative technology

PROPERTY PROTECTION & FIRE SAFETY

The right door solution for every requirement

FRONT DOORS & APARTMENT ENTRANCES

Guaranteed safety, heat insulation and design variety
